DETAILED ACTION

The amendment and remarks filed 7/2/03 have been acknowledged and entered.

The objections to the abstract and the drawings, and the rejections under 35 USC 112, second paragraph, and under 35 USC 103(a), stated in paper No.8 have been withdrawn in view of applicant's amendment.

Claim Objections

1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not).

Misnumbered claims 11-13 has been renumbered 22-24.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Muntz et al. (GB'483).

This rejection stated in paper No. 8 is maintained.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 3-5, 7-8, 10, and 22-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Muntz et al..

Muntz et al. as discussed supra in paper No. 8 teach a method for removing dirt from a surface by means of steam and cleaning solution as

Art Unit: 1746

claimed. Muntz et al. do not teach the preheating step, the pressure, suction, the ratio, and removing the chewing gum residues as claimed.

It would have been obvious for one skill in the art at the time applicant invented the claimed process to adjust the ratio of the steam and cleaning agent and to adjust the pressure to obtain optimum results.

It would have been obvious for one skill in the art to use the steam and detergent taught by Muntz et al. for removing chewing gum residues, because using steam for removing chewing gum residues is well known in the art.

It would have been obvious for one skilled in the art to preheat the cleaning agent in Muntz et al. process before the injection to improve and enhance the cleaning process.

It would have been obvious for one skilled in the art to use suction in the Muntz et al. process to remove the collected dirt, because it is well known in the art.

Allowable Subject Matter

5. Claim 9 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Drawings

6. The drawings were received on 7/02/03. These drawings are approved.

Response to Arguments

7. Applicant's arguments with respect to claims 1-10 and 22-24 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's argument with respect to Muntz et al. is unpersuasive, because bringing the cleaning agent and steam into gaseous state is inherent in Muntz et al. process.
